| Title                                                                                                                                            | URL | Authors                                                                    | Host item title |
|--------------------------------------------------------------------------------------------------------------------------------------------------|-----|----------------------------------------------------------------------------|-----------------|
| The impact of submarine outfalls of treated wastewater on the microbial community structure and the resistome of the coastal marine environment  |     | Kvesić Ivanković, Marija                                                   |                 |
| Analiza raspodjele saliniteta u Prokljanskom jezeru                                                                                              |     | Rumenović, Ružica                                                          |                 |
| Utjecaj rada hidroelektrane Zakučac na obalno područje grada Omiša                                                                               |     | Raos, Mia                                                                  |                 |
| Procjena poplavnog rizika s utjecajem nesigurnosti                                                                                               |     | Kekez, Toni                                                                |                 |
| Numeričko modeliranje pronosa konzervativnog zagađenja u ušću rijeke Jadro korištenjem programskog paketa MOHID                                  |     | Poljak, Dijana                                                             |                 |
| Preliminarna procjena rizika od bujičnih poplava na području grada Kaštela                                                                       |     | Radnić, Petra                                                              |                 |
| Procjena unosa hranjivih tvari u akvatorij Bračkog kanala                                                                                        |     | Peović, Josip                                                              |                 |
| Numerical modeling based on spline basis functions : application to groundwater flow modeling in karst aquifers and advection dominated problems |     | Malenica, Luka                                                             |                 |
| Utjecaj varijacija protoka na raspodjelu koncentracija hranjivih tvari u rijeci Jadro                                                            |     | Jukić, Antonija                                                            |                 |
| Concentration statistics for conservative solute transport in river estuaries                                                                    |     | Galešić, Morena                                                            |                 |
| New Screening tool for Obtaining Concentration Statistics of Pollution Generated by Rivers in Estuaries                                          |     | Galešić, Morena; Andričević, Roko; Divić, Vladimir; Šakić Trogrlić, Robert |                 |
| Idejni projekt male hidroelektrane Prančevići - verzija s tunelom                                                                                |     | Babić, Anita                                                               |                 |
| Analiza indikatora opterećenja vaterpolista u situacijskim uvjetima s obzirom na različite uloge u igri                                          |     | Lozovina, Mislav                                                           |                 |
